

Under the bill, states and local workforce investment areas will be able to offer unemployed individuals who are most in need of help a reemployment account of up to \$3,000. With these accounts, unemployed workers may purchase a variety of different services to help them find a good job, including job training, child care, transportation, housing assistance, short-term classes to upgrade skills, and employment counseling.

One of the important features of the bill is that it provides individuals with significant new flexibility to design a package of services tailored to meet their needs. By taking into account the needs of the unemployed on an individual basis, our local, State, and federal governments will better equip these individuals with the tools they require to secure long-term, meaningful employment.

In addition, recipients will be able to keep the balance of the account as a cash reemployment bonus if they become reemployed within 13 weeks and stay employed for six months.

These new Personal Reemployment Accounts and the current job training services already administered under the Workforce Investment Act are both essential in helping displaced workers in areas of the country facing skill shortages and enhancing the workforce for our increasingly knowledge-based economy.

The Secretary of Labor already has begun the process of testing the PRA concept through a very limited pilot program. However, the authority of this bill would allow the Secretary to test the concept in more areas, either within the seven states already participating or in additional states. The lessons learned through this demonstration program will help inform Congress regarding the best way to serve the unemployed and ultimately will result in better reemployment and training services for all workers.

Over the past two years, Republicans have taken numerous steps to help unemployed workers. I am also proud to join 21st Century Competitiveness Subcommittee Chairman MCKEON and Chairman BOEHNER of the Education and the Workforce Committee in introducing the Job Training Improvement Act of 2005. This bill will reauthorize and enhance the services provided through the Workforce Investment Act and the nation's one-stop delivery system for workforce development. I am pleased that the provisions of the Worker Reemployment Accounts Act are included in this broader reauthorization package.

I look forward to working with my colleagues to improve job training opportunities for all Americans and offer this new innovative option to help workers as quickly as possible. The choice and flexibility available through a Personal Reemployment Account is the additional assistance American families need to get back into high-wage, steady employment. By providing this enhanced assistance, we can ensure that Americans are able to meet the challenges of the ever-changing economy that they face.

I was proud to see similar legislation pass in the House of Representatives in the 108th Congress, and am excited to see it become law in the 109th Congress. I urge my colleagues to support this critical legislation.

THE REINTRODUCTION OF THE 21ST CENTURY WATER COMMISSION ACT

HON. JOHN LINDER

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 2005

Mr. LINDER. Mr. Speaker, today I reintroduced my proposal, the "21st Century Water Commission Act." This proposal, which was approved by the House on November 21, 2003, but unfortunately not considered by the other body before the 108th Congress adjourned, will bring together our nation's premier water experts to recommend strategies for meeting our water challenges in the 21st century.

Some highlights of my 21st Century Water Commission legislation are as follows:

The commission will look for ways to ensure fresh water for U.S. citizens for the next 50 years;

The commission will be composed of nine members appointed by the President, and key leaders in the House and Senate;

The commission will look for ways to eliminate duplication and conflict among federal governmental agencies;

The commission will consider all available technologies and other methods to optimize water supply reliability, availability, and quality, while safeguarding the environment;

The commission will hold hearings in distinct geographical regions of the United States, and in Washington, D.C., to seek a diversity of views, comments, and input; and

A final report will be due within three years of the commission's inception. The report will include a detailed statement of the findings and conclusions of the commission, as well as recommendations for legislation and other policies.

I want to be clear that this bill does not give the federal government more direct authority or control over water. Rather, this commission will make recommendations on how we can coordinate water management efforts on all levels so that localities, states, and the Federal government can work together to enact a comprehensive water policy to avoid future water shortages.

As Benjamin Franklin noted in 1746, "When the well's dry, we know the worth of water." Nothing could be truer, and many states across the country that are currently facing a water crisis, or have in the last few years, understand the wisdom of these words.

I look forward to working with my colleagues in the House in moving this bill forward promptly. The U.S. cannot afford to reevaluate its water policies every time a crisis hits. Now is the time to get ahead of this issue, and I believe that the 21st Century Water Commission can serve as a channel for sharing the successful strategies and ideas that will allow us to do so.

TRIBUTE TO JACK HALPERN

HON. JOSÉ E. SERRANO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 2005

Mr. SERRANO. Mr. Speaker, I rise today to pay tribute to Mr. Jack Halpern, a highly ac-

complished Jewish American who will be honored on January 27, 2005, at the Annual Northeast Regional Tribute of the American Israel Public Affairs Committee.

Jack, a resident of Manhattan, lives with his wife Lieba and their two wonderful children. He is a managing member of Atlantic Realty, which develops residential and commercial real estate in New Jersey, New York and Israel.

In addition to his duties with Atlantic Realty, Jack somehow finds the time to work as an activist. Following in the footsteps of his father Sam, who founded the family business after surviving the Holocaust, Jack has become an active supporter of numerous Jewish causes. As a member of AIPAC's National Executive Committee, Jack has been a leader in strengthening ties between the U.S. and Israel for many years.

In 2002, Jack founded the Energy Independence Task Force at the American Jewish Congress, where he currently serves on the Governing Council and Executive Committee. This important task force continues to work for fuel efficiency standards in trucks and SUVs. In addition they have met with many key Congressional and Administration officials in order to deliver the message that a long-term national energy policy focusing on reducing the United States' dependency on Middle East oil is a national security imperative.

Jack's long-time associations also include State of Israel Bonds, the Jewish Community Center of Manhattan, the Holocaust Resource Foundation, the Technion Institute and the Weizmann Institute of Science in Israel.

Mr. Speaker, Jack Halpern is a model American citizen worthy of the award which will be bestowed upon him. His efforts have not only helped to strengthen the two countries he cares most deeply for (America and Israel) but have also helped to strengthen their special relationship.

For his continued service on AIPAC's Executive Committee and his work on improving U.S.-Israeli relations, I ask my colleagues to join me in paying tribute to Mr. Jack Halpern.

INTRODUCING THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION ACT

HON. VERNON J. EHLERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 4, 2005

Mr. EHLERS. Mr. Speaker, today I am pleased to introduce the National Oceanic and Atmospheric Administration Act. Better known as NOAA, the National Oceanic and Atmospheric Administration was created by Executive Order in 1970. It is the nation's lead civilian agency for oceans and atmosphere, yet Congress has never passed an overarching organic act describing the mission and functions of the agency. Instead, over the past 34 years Congress has defined the mission of the agency in a piecemeal manner with legislation focused on specific issues. The bill I am introducing today, which passed the Environment, Technology and Standards Subcommittee in the 108th Congress, is a first step toward Congressional passage of comprehensive legislation for NOAA.

Last year, the U.S. Commission on Ocean Policy released its long awaited report with
